

# El Nino, La Nina the Moon and Kenyan Fish Figures

There have been 3 "La Nina" events over the past 20 years. As shown above, Blue and Striped marlin numbers (as apposed to Black Marlin, Broadbill or Sailfish) certainly appear to increase quite dramatically when "La Nina" is affecting the Pacific Ocean. The moon phase graph below shows the main Sailfish run out of Ngomeni/Malindi between Sept. 04 & Nov. 04. Red (Sailfish figures, left axis), White (moon phase) and Blue (height of tide, i.e. spring to neap tides).
